HOW TO REPLACE MH.SCR FILE

- Save a copy of the MH.SCR file locally to your machine.
- Replace the file located in the following path with the one saved from the web portal

 $C: ASY \longrightarrow SYS \longrightarrow CNF \longrightarrow MH.SCR$

 Open the ASYCUDA Module that you work with and follow the subsequent steps:
(1) Options → (2) Communications → (2) Edit Script Remove the additional space between 3 and 500 as shown below.
